

## Improve Productivity and Reduce Costs with the CheckJet® Family

From auto-signing to on-demand check form printing, the CheckJet® family continues TypeHaus' pursuit of greater efficiency in forms printing and handling. With CheckJet, stay focused on real accounting tasks. On-demand check form printing eliminates ordering and handling preprinted checks. Auto-signing eliminates tedious hand-signing stacks of payroll and other repetitive check runs.

Imagine the time savings from having your printer automatically sign checks using completely secure signatures. Imagine no longer handling and reordering boxes of preprinted checks. The CheckJet family brings those visions to life.

### automatic check signing

Each member of the CheckJet family monitors the commands being sent to your printer. Upon detecting a check print job, the CheckJet automatically includes the appropriate signature(s). The signatures can be stored in either the base CheckJet device, or in a removable compact flash (CF) card depending upon your security requirements. In both cases encryption renders the signatures accessible to only the CheckJet itself. Using the CF card allows physical removal of the signatures from the CheckJet, thereby preventing automatic check signing when not authorized.

### checks on-demand

Using the same approach as check signing, the CheckJet family can automatically print the entire check form upon detecting a check print job. This eliminates the need for ordering and handling boxes of preprinted checks for each bank account.

### windows and enterprise

CheckJet Windows Edition works with most Windows based applications that rely upon Windows printer drivers, including Crystal Reports. Enterprise Edition includes all Windows Edition functionality, plus many of the fonts and other features expected by enterprise scale applications like PeopleSoft and SAP.

USA Customer Service

Save Time with the CheckJet Family

## features & benefits

- Auto-signing eliminates tedious manual check signing
- On-demand check form printing eliminates managing inventories of preprinted checks
- Wide range of security stock available for significantly less than preprinted checks
- Incorporate advanced security features into check runs
- Consolidate check printing onto common paper supply
- Fast and easy installation

"...estimated gross check losses represent an average *annual increase* of approximately 5 percent..." Board of Governors, Federal Reserve System, April 2007 Report to Congress. The CheckJet family reduces fraud opportunity by facilitating the use of high security check stock while storing sensitive information away from client PCs.

- Per-check cost savings from 55% to 60% depending upon printer model
- Compatible with most network attached laser printers
- MICR toner available for most major laser printers

On-demand check form printing requires magnetically sensitive MICR toner for efficient processing by ultra high speed check sorting machines. Using MICR toner is as simple as replacing the printer's existing toner cartridge with a similar cartridge containing MICR toner. TypeHaus supplies cost effective MICR toner cartridges for most major laser printers. Auto-signing using existing preprinted checks does not require MICR toner.

## about us

TypeHaus designs and manufactures printer hardware devices and software solutions to support enterprise applications requiring enhanced printer resources. TypeHaus is recognized by Fortune 500 companies for its expertise in print stream control, line of high-quality products, and unparalleled pre-sales and post-sales customer support. TypeHaus solutions enable current and legacy systems to take advantage of the latest printing technologies. We are a stocking supplier of check stock and MICR toner. We have been providing solutions for critical document printing since 1992.

## warranty & support

All TypeHaus hardware products come with a one-year limited warranty against defects in materials and workmanship from the original date of purchase. Warranty upgrades available.

We always strive to provide a high level of customer service. Our US based service team creates a dependable relationship focused on delivering quality technical support. TypeHaus offers phone support during our regular business hours of 8:00 am to 5:00 pm Pacific Time Monday through Friday.
