

FormJet® Pro

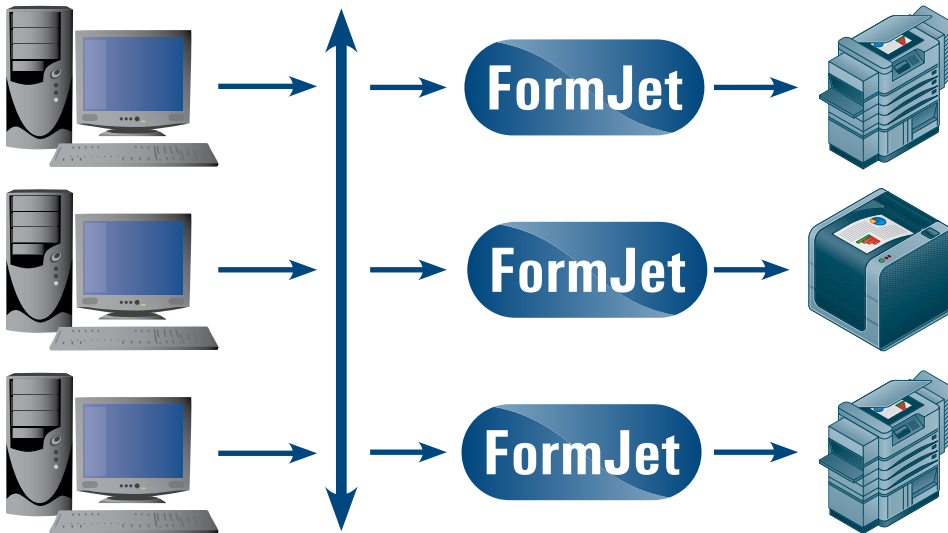

On-the-Fly eForms & Print Job Reformatting

- ✓ eForms
- ✓ Automatic Barcoding
- ✓ Print Job Reformatting

FormJet Pro sits between your printer and your network. It automatically assumes the network properties of your printer, and appears to all clients as the original printer. FormJet accepts print jobs bound for the printer, reprocesses them to fulfill your company's modernization goals, then forwards the jobs to the printer. No modifying your ERP, EMR, or other enterprise systems. No additions to your sensitive servers.

Reprocessing can include simply adding barcodes or electronic form backgrounds to eliminate purchasing preprinted forms. More sophisticated reprocessing can extract data from existing print jobs for complete reformatting to produce entirely new modernized output. Since FormJet Pro never retains any of the print job data, no potential exists for violating HIPPA or other privacy regulations.

FormJet Pro arrives as a small powerful standalone device with your solution preinstalled. Just use the included network cable to connect the FormJet between your printer and network. No configuration required. The FormJet automatically adopts the printer's network configuration settings.

about us

TypeHaus designs and manufactures printer hardware devices and software solutions to support enterprise applications requiring enhanced printer resources. TypeHaus is recognized by Fortune 500 companies for its expertise in print stream control, line of high-quality products, and unparalleled pre-sales and post-sales customer support. TypeHaus solutions enable current and legacy systems to take advantage of the latest printing technologies. We are a stocking supplier of check stock and MICR toner. We have been providing solutions for critical document printing since 1992.

advanced PDF and email solutions

TypeHaus also offers the FormJet Enterprise solution that includes advanced features such as PDF archiving and email distribution.
